Date

Expt. No. 3 Page No.

AIM: To design and stimulate a star topology using A switch and hub.

Steps

→ Drag 5 PCs in the environment from end devices.
→ Assign IP addresses.
→ Place the PCs around the switch/hub.
→ Click connection choose copper-struct-through wire.
→ Connect all of them to HUB/Switch.
→ Click on envelope icon to send a message.
→ Select Sender
Receiver
→ Simulate and Play

Conclusion

→ Hub will broadcast the message to all but only receiver will accept the message.

→ Switch will broadcast only the first time after that it will only send it to receiver.
